## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's after final amendment filed on June 26, 2006 has been entered. No claim has been amended. No claim has been cancelled. Claims 20-22 have been added. Claims 1, 3-5, 7, 9-11 and 15-22 are still pending in this application, with claims 1, 15 and 17-22 being independent.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1, 3-5, 7, 9-11, 15 and 16 have been fully considered and are persuasive. The rejection of the cited claims has been withdrawn.

### ***Allowable Subject Matter***

3. Claims 1, 3-5, 7, 9-11 and 15-22 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicant teaches an illuminated doorframe having at least three frame members including two side panels and an overhead lintel, the side panels being separated by the lintel. The frame members are formed of a hollow construction and include an interior portion for receiving a door, an open exterior portion for attachment to a support structure, and outwardly facing first and second side faces, such faces defining an outer

periphery. A channel or raceway is formed in the side faces, substantially traversing the maximum outer periphery. An outwardly open electroluminescent strip is located on or within the channel for lighting the outer periphery of the doorframe.

**MORRIS** (U.S. Pat. 6,058,635) discloses an illuminated doorframe including two side panels and an overhead lintel. Illuminated signs are integrally formed into the door frame for lighting the door frame in case of a emergency. However, the cited reference fail to individually disclose, or suggest when combined, the light source being an electroluminescent element located on or within a channel or raceway formed in the frame elements, such channel/raceway substantially traversing the periphery of such door frame.

**CHIEN** (U.S. Pat. 5,775,016), **BRESNAN** (U.S. Pat. 6,025,773), **BODLE** (U.S. Pat. 6,276,634), **GEORGE et al.** (U.S. Pat. App. Pub. 2003/0189823) and **CHIARUCCI** (U.S. Pat. 6,785,992) disclose emergency illumination systems including an electroluminescent element positioned along walls and exit door for illuminating an exit route during an emergency. Some disclose electroluminescent elements position about the periphery of exit doors. However, the cited references fail to individually disclose, or suggest when combined, the electroluminescent elements being located on or within a channel or raceway formed in frame elements of a door, such channel/raceway substantially traversing the periphery of such doorframe.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically a door frame including an electroluminescent elements located on or within a channel or raceway formed in the

frame elements of the door, such channel/raceway substantially traversing the periphery of such door frame.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
